PROFILE SUMMARY

B.Tech Computer Science and Engineering student at St. Joseph's College of Engineering and Technology with hands-on experience in full-stack web development using the MERN stack and mobile application development with Flutter. Proficient in programming languages including C, Java, and Python. Possesses a strong interest in emerging technologies such as artificial intelligence, machine learning, cloud computing, and ethical hacking. Demonstrates strong problem-solving and analytical abilities, along with effective teamwork and collaboration skills. Passionate about continuous learning and motivated to apply technical knowledge to real-world software development projects while contributing to innovative and scalable solutions.

SKILLS

Technical skills: Full-Stack Development using MERN Stack
Programming Languages: C, Java, Python
Web Technologies: HTML, CSS, JavaScript
Frameworks & Libraries: React.js, Node.js, Express.js, Flutter
Databases: MySQL, MongoDB, SQL, NoSQL
Tools & Platforms: GitHub, Power BI, ChatGPT, Supabase
Soft Skills: Problem-solving, Teamwork, Coordination, Critical Thinking, Decision Making
Core Concepts: Object-Oriented Programming (OOPs)

EDUCATION

Bachelor of Technology in Computer Science and Engineering
St. Joseph's College of Engineering and Technology, Pala
Affiliated to APJ Abdul Kalam Technological University
Duration: 2022 – 2026
CGPA: 7.52

Higher Secondary Education (Bio Science)
Government Higher Secondary School, Edakkoly
Duration: 2020 – 2022
Percentage: 95.5%

Secondary Education (ICSE)
Chavara CMI International School, Amanakara
Percentage: 92.6%

PROJECTS

VolHub – A Volunteer Management System for Effectively Managing Events
Mobile Application | Flutter, Supabase

- Developed a volunteer management platform that connects organizers, managers, and volunteers to efficiently plan and manage events.
- Implemented event creation and registration features enabling organizers to publish events and volunteers to discover and participate in suitable opportunities.

- Built a hybrid recommendation system that suggests relevant events to volunteers based on their skills, interests, certifications, previous event participation, and rating scores provided by organizers and managers**.**
- Designed an intelligent volunteer selection mechanism that recommends high-performing volunteers to managers based on skill matching, certifications, reviews, ratings, and computed rank scores.
- Implemented a manager recommendation system that suggests reliable event managers to organizers based on ratings, reviews from volunteers and organizers, completed events, and their ability to manage volunteers effectively.

Plantzo – E-Commerce Platform for Decorative Plants
Full-Stack Website | MERN Stack

- Developed a full-stack e-commerce platform for selling indoor and outdoor decorative plants, fertilizers, and flower seeds using the MERN stack.
- Integrated an AI-powered chatbot ("Levia") capable of detecting diseases in decorative plants and providing detailed information on symptoms and solutions.
- Implemented user-friendly product browsing, category management, and chatbot interaction to enhance customer experience.
- Focused on scalable architecture and clean UI for seamless navigation and performance.

URL Shortener Web Application
Website | HTML, CSS, JavaScript, Node.js

- Built a URL shortening application that converts long URLs into short, user-defined links for easy sharing and access.
- Implemented redirection logic to route users to the original URL when the shortened link is accessed.
- Designed a simple and intuitive interface to manage and access shortened links efficiently.

INTERNSHIP

Python Programming Intern
Keltron Knowledge Centre, Pala
June 2024 – July 2024

- Gained hands-on experience in Python programming, covering core concepts such as control statements, functions, modules, and basic application logic.
- Worked on database connectivity using MySQL, including executing queries and integrating databases with Python applications.
- Developed simple GUI-based programs to understand user interaction and backend integration.

CERTIFICATIONS

- Full Stack Development using MERN Stack
- Google Certified Educator – Level 1
- Gemini University Student Certificate
- Java for Beginners: Your Easy Guide to Java Programming – Infosys Springboard

ACHIEVEMENTS

- NCC 'B' Certificate Holder**;** Former National Cadet Corps (NCC) Cadet
- First Prize Winner**,** Food Hackathon, *NAKSHATRA 2025* – Saintgits College of Engineering, Kottayam (Feb–Mar 2025)
